Use 100% silicone to seal the two halves together. Apply a bead around the entire seam then use a piece of cardboard as a squeegee to smooth it out.

1/4-28 x 5/8 HHCS
1/4 AN Washer
1/4 Nyllok Heat Nut
5/16-18 x 1 BHCS
5/16-18 Flanged Nut

1/4-28 x 5/8 HHCS
1/4 AN Washer

8 Places

5/16-18 x 1 BHCS
5/16-18 Flanged Nut
4 Places

1/2 Thru Hole
8 Places

11/32 Thru Hole
4 Places
These are the holes that the 5/16 bolts of the center fit through.

Note:
The 5/16-18 x 1 BHCS is threaded through the back of the wheel center. Use blue or red lock tight when replacing this screw.
If the outside half did not come with a hole for the valve stem, drill a 7/16" hole through the horizontal part of the outside half.
